

## **Smart Publishing Assistant**

Gain insights faster.

Make connections visible.

Prepare better-informed decisions.

**We don't automate publishing.**

**We automate the work around the book project.**

**GDPR compliant.**  
No AI training.  
Data stored in the EU.

## Good books are created by people. Good decisions take time.

A book project contains more information than a publisher can use manually. narratiQ analyzes book projects and makes the resulting information directly usable for different tasks across the publishing house.

**Content · Themes · Characters · Target audiences · Positioning ·  
Market potential · Keywords · Metadata · Marketing approaches ·  
Licensing potential**

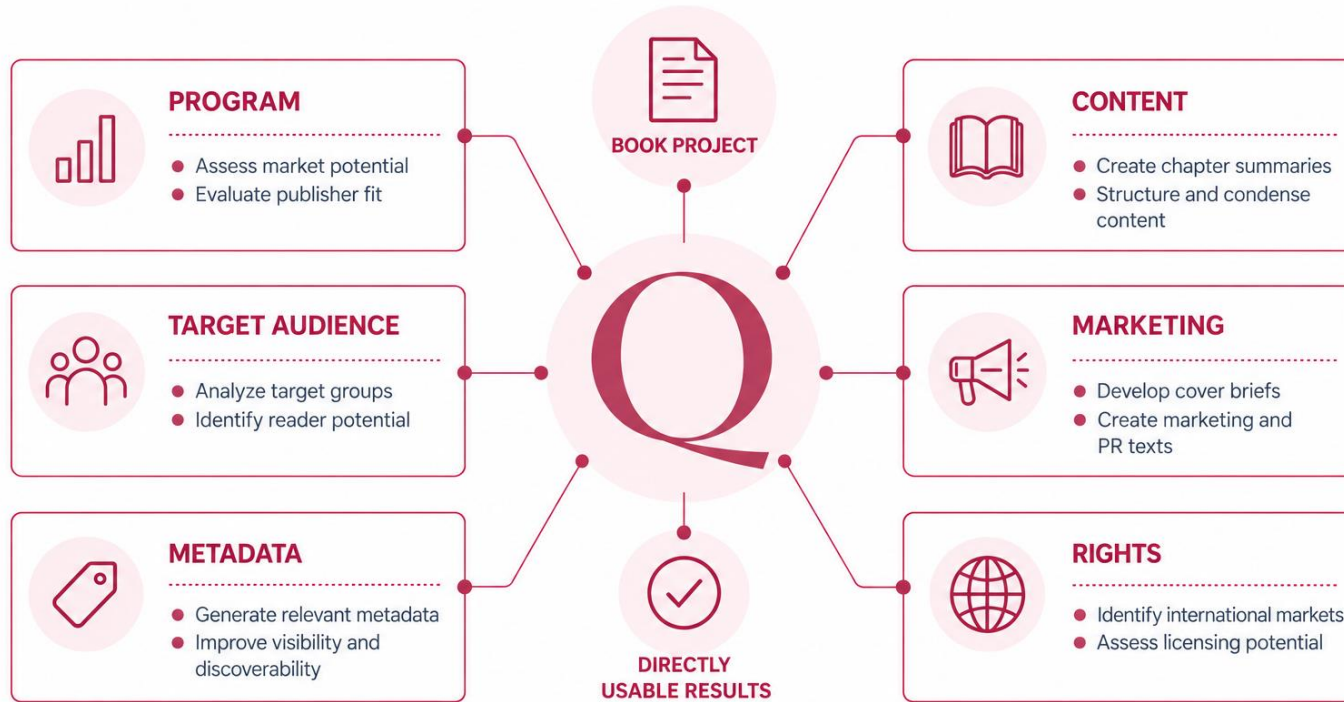

narratiQ supports you in your daily routine tasks.

**Less research.**

**Less duplicated work.**

**More time for publishing decisions.**

# One book project. Many decisions.

Analyze once. Use in many ways.

## Less manual work. More value creation.

**TIME**

---

Save time!

**QUALITY**

---

Improve  
quality!

**REVENUE**

---

Increase  
revenue!

**COSTS**

---

Reduce  
costs!

**RISK**

---

Minimize  
risk!

# Core USPs

No black box.

## **Traceable results**

Results with specific references to passages in the manuscript.

## **Full data control**

Clear data deletion periods and full control over your data.

## **People decide**

Publishing decisions remain with the publisher.

## **Experience becomes scalable**

Technology makes publishing expertise accessible and scalable. It does not replace it.

## **We don't automate publishing.**

**We automate the work around the book project.**

# Meet us at the Frankfurt Book Fair

## Live-Demo at the Frankfurt Book Fair

October 7–9, 2026

Hall 5 • Booth B86

[Schedule an appointment! >](#)

### Bring us a book project.

We'll show you live which information and concrete insights narratiQ can generate from it.
